

Could you please help me understand what has happened here?

When your Email Review website was set up, I read the FAQ, in which it said:

*Q: Do any of the Review team members have a predetermined view on climate change and climate science?*

*A: No.*

Then Professor Boulton stated that in fact he did hold firm views on the issue.

In response, on Feb 15<sup>th</sup> Sir Muir Russell said on your website *'...it would be impossible to find somebody with the qualifications and experience we need who has not formed an opinion on climate change.'*

1 How is this statement compatible with the FAQ?

2 If Members Clarke, Eyton and Norton do have *'the qualifications and experience we need'*, which I assume they must do, does this mean they must have *'formed an opinion on climate change'*?

This Inquiry is important, as the UEA have recognized, so I would be grateful if you could clarify these conflicting statements for me, and also clarify what, if any, views the Members Clarke, Eyton and Norton hold on *'climate change and climate science'*.

If you cannot help, I would be grateful if you could forward the email to someone who can?

Many thanks.

Roderick Campbell
