

Dear Sir Muir-Russell, you should read the [link to The David Hume Institute Report “Reducing Carbon Emissions – the View from 2050”

<http://www.davidhumeinstitute.com/DHI%20Website/publications/hop/HOP%2079%20Reducing%20Carbon%20Emissions%20-%20the%20View%20from%202050.pdf> ], particularly pages 23 onwards.

As you can see Professor Boulton is a fully paid-up member of the AGW supporters club.

He even parrots the IPCC line on the Netherlands- which we now know to be false.

So much for the "sceptical scientist".

Dr. D. R. Keiller
