

I have been following the discussion relating to Geoffrey Boulton and his qualifications for inclusion on the CCE Review Panel. It is exceeding strange to see that Mr Boulton has apparently been economical with the truth when it comes to declaring his position on climate change, relationships with UAE and CRU, and involvement with the IPCC.

To put not too fine a point on it, omissions of pertinent information are the same as lies.

There is a reason that court oaths require that witnesses tell the truth, the whole truth, and nothing but the truth.

Your review is severely compromised already. Unless you take action to remove Mr Boulton, your review will become a laughing stock, if it isn't already.

Given what has been revealed in recent months, the world desparately needs dispassionate review and remorseless commitment to finding the truth.

The last thing we need is CYA activity, through a review panel appointing mates who are not declared as mates.

Come on guys.
